### **30. Thesis and Dissertation Advising/Post-doctoral Student Supervision:**

- Laparoendoscopic Fellowship Director: Head one of only a handful of fellowships in the US to provide an advanced flexible endoscopy training to surgeons. The University of Miami / Jackson Memorial Hospital Fellowship in Laparoendoscopic and Bariatric Surgery provides trainees with the clinical and academic skills to become leaders in the field of surgical endoscopy and to teach other surgical trainees the same skills required to achieve this status. The fellowship features an independent Surgical Endoscopy Center (SEC) where all forms of flexible endoscopy are performed by surgeons to educate the fellow. Procedures such as therapeutic ERCP, pseudocyst drainage, intestinal stenting, and endoluminal therapy for GERD are conducted in addition to the usual upper and lower endoscopic cases.
